

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

- ZONE A** No base flood elevation determined
- ZONE AE** Base flood elevation determined
- ZONE AH** Flood depths of 1 to 3 feet (average depth determined); base flood elevation determined
- ZONE AD** Flood depths of 1 to 3 feet (average depth determined); base flood elevation determined
- ZONE A99** To be protected from 100-year flood by federal flood protection system under construction; no base flood elevation determined
- ZONE V** Coastal flood with velocity hazard (average depth determined); no base flood elevation determined
- ZONE VE** Coastal flood with velocity hazard (average depth determined); no base flood elevation determined

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

- ZONE X** Area of 100-year flood, area of 100-year flood with average depth of less than 1 foot, with drainage area less than 1 square mile and area protected by levee from 100-year flood

OTHER AREAS

- ZONE D** Area in which flood hazard is undetermined

UNDEVELOPED COASTAL BARRIERS

BOUNDARIES

- Floodplain Boundary
- Floodway Boundary
- Zone D Boundary
- Boundary Dividing Special Flood Hazard Zones, and Boundary Dividing Areas of Different Flood Hazard Elevations Within the Special Flood Hazard Zones

DEVIATION LINES

- 513** Base Flood Elevation Line; Elevation in Feet
- (D)** Cross Section Line
- REL 9871** Base Flood Elevation in Feet Where Unlike Within Zone
- RM 7₁** Revision Reference Mark
- M1.5** River Mile

**Referenced to the National Geodetic Vertical Datum of 1929*

NOTES

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all elevations of features outside Special Flood Hazard Areas. The community map authority should be consulted for possible updated flood hazard information prior to use with the map for property purchase or construction purposes.

Coastal flood elevation symbols apply only to landward of 100-year flood, and include the effects of wave action; these elevations may also differ significantly from those developed by the National Weather Service for hurricane evacuation planning.

Average depth of flood (100-year flood) in Zone A, AE, AD, AH, V, and VE.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodway width was based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway width in some areas may be too narrow to show to scale. Floodway widths are provided in the Flood Insurance Study Report.

Elevation reference marks are described in the Flood Insurance Study Report. For all map panels were separately printed Map Index.
